User

SI

DB

1 : Click on login

2 : Show the login form

3 : Enter login information

4 : Click the log in button

5 : Check if the form has been submitted

6 : Check that the fields are correctly filled in.

7 : Check the format of user inputs.

8 : Clean up the information

9 : Send the query

10 : execute the query

11 : Return the query response

12 : Check if the account exists

13 : Check if the password is valid

14 : Log in the user

15 : Redirect to the connected space

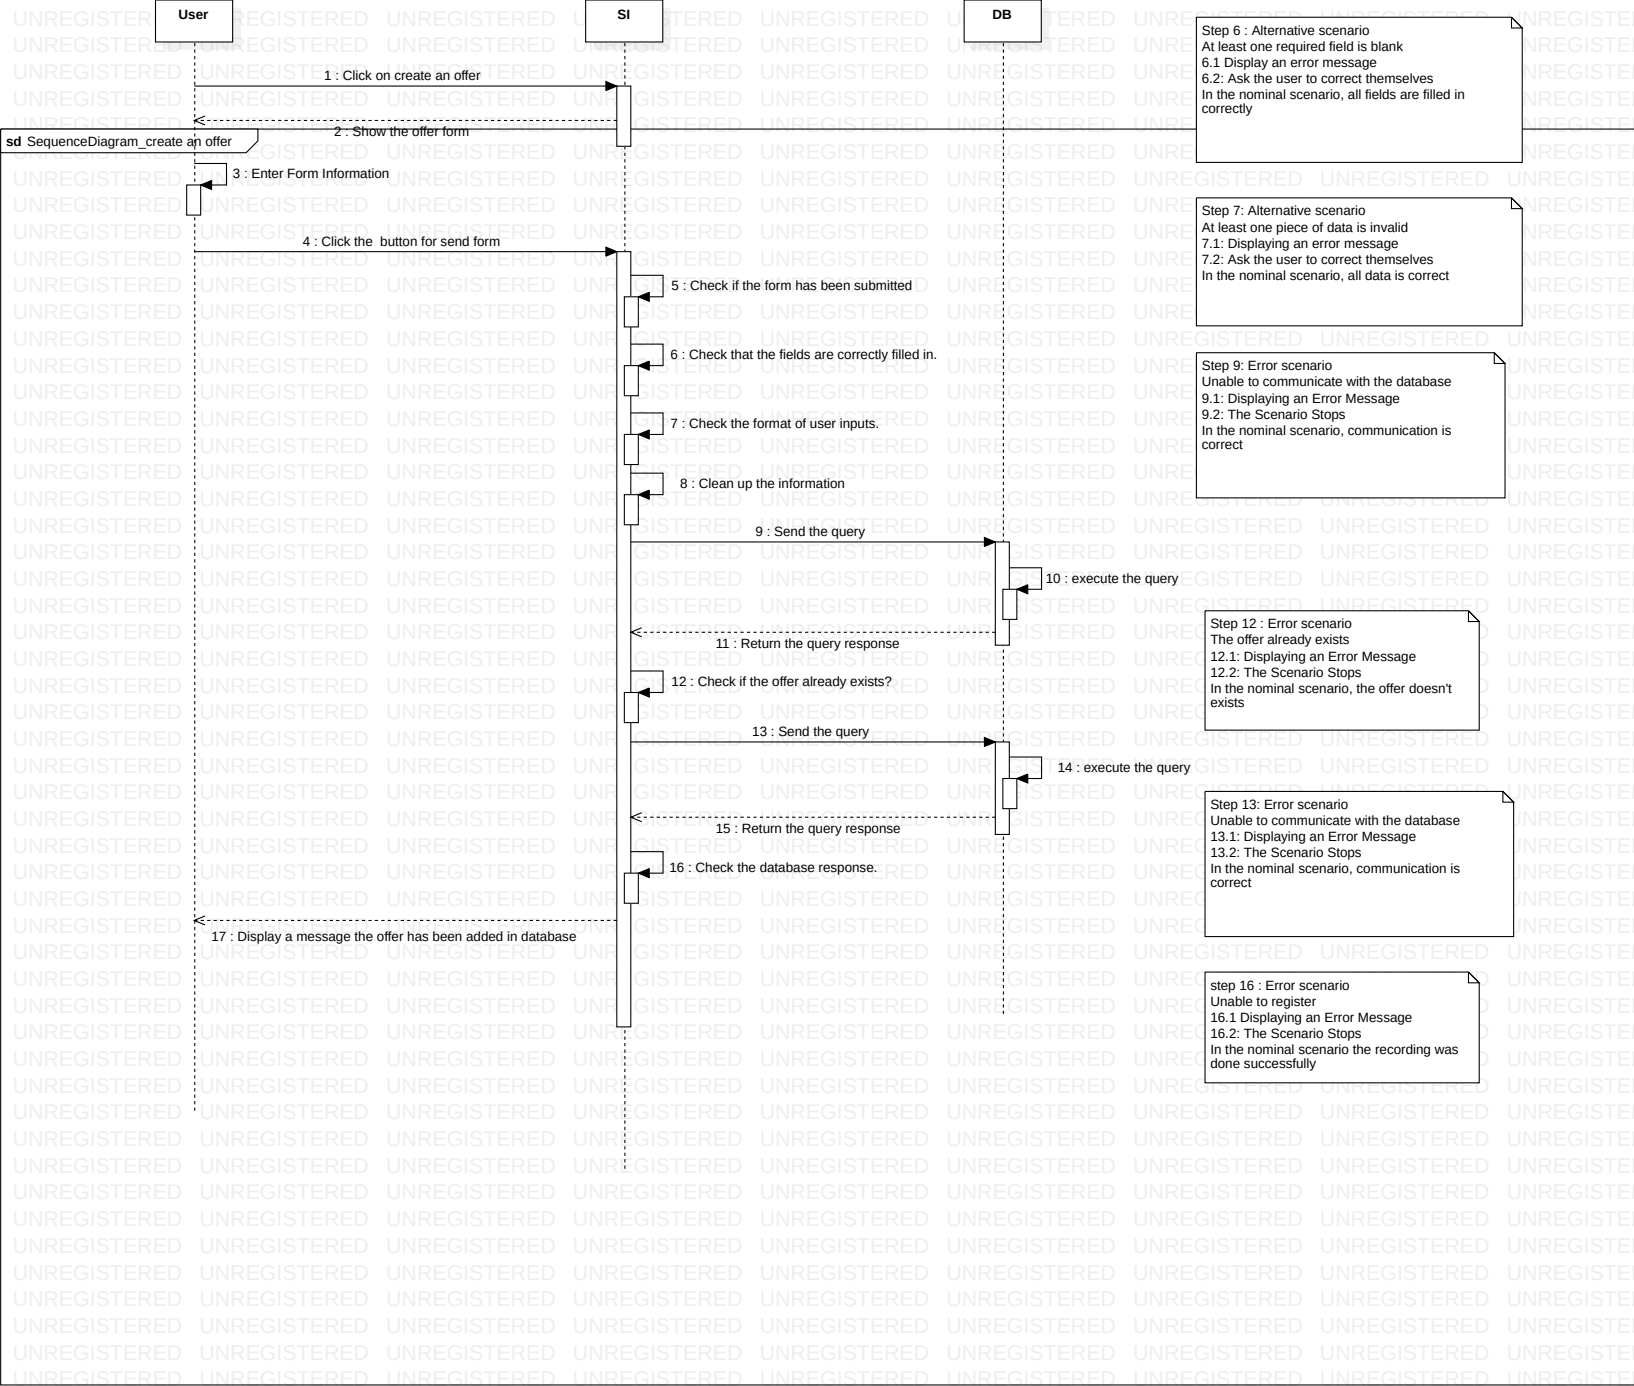

Step 6 : Alternative scenario
At least one required field is blank
6.1 Display an error message
6.2: Ask the user to correct themselves
In the nominal scenario, all fields are filled in correctly

Step 7 : Alternative scenario
At least one piece of data is invalid
7.1: Displaying an error message
7.2: Ask the user to correct themselves
In the nominal scenario, all data is correct

Step 9 : Error scenario
Unable to communicate with the database
9.1: Displaying an Error Message
9.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 12 : Error scenario
Account does not exist
12.1: Displaying an Error Message
12.2 The Scenario Stops
In the nominal scenario, the account exists

Step 13 : Error scenario
Incorrect password
13.1: Displaying an Error Message
13.2 The scenario stops
In the nominal scenario th password is correct

Step 6 : Alternative scenario
At least one required field is blank
6.1 Display an error message
6.2: Ask the user to correct themselves
In the nominal scenario, all fields are filled in correctly

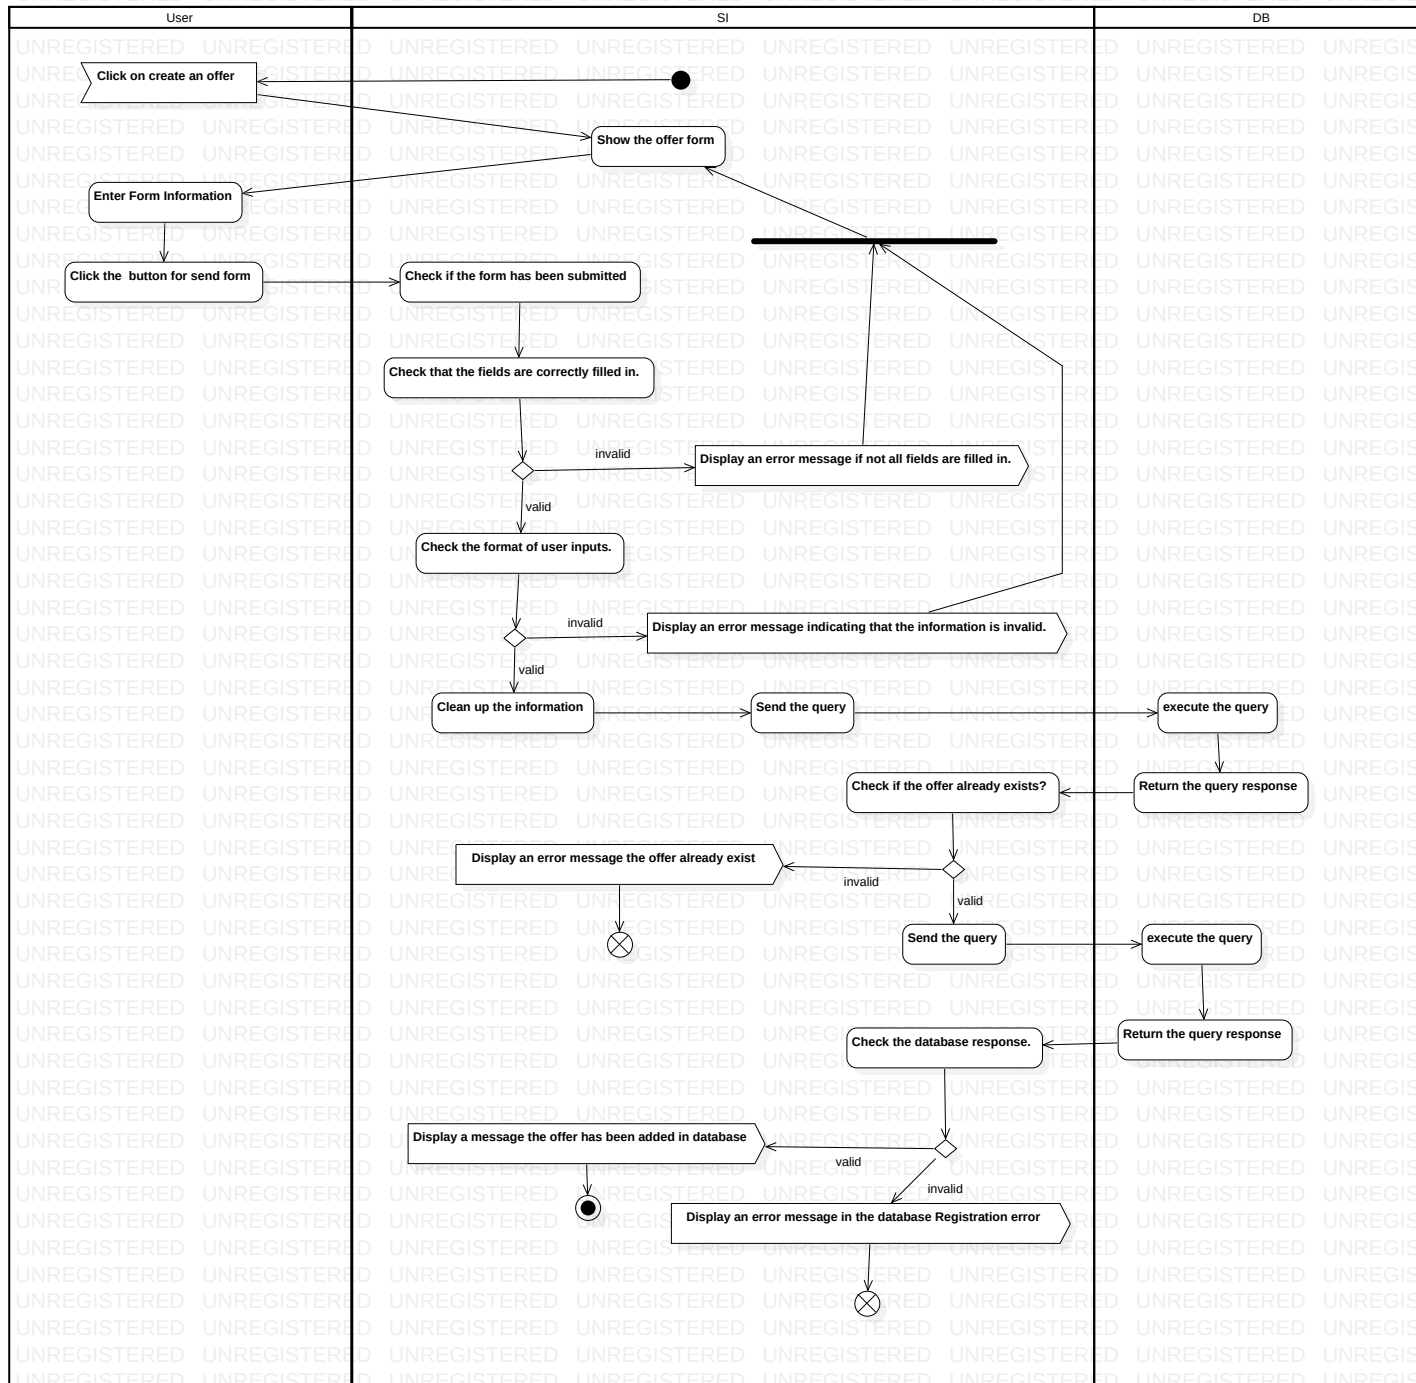

Step 7: Alternative scenario
At least one piece of data is invalid
7.1: Displaying an error message
7.2: Ask the user to correct themselves
In the nominal scenario, all data is correct

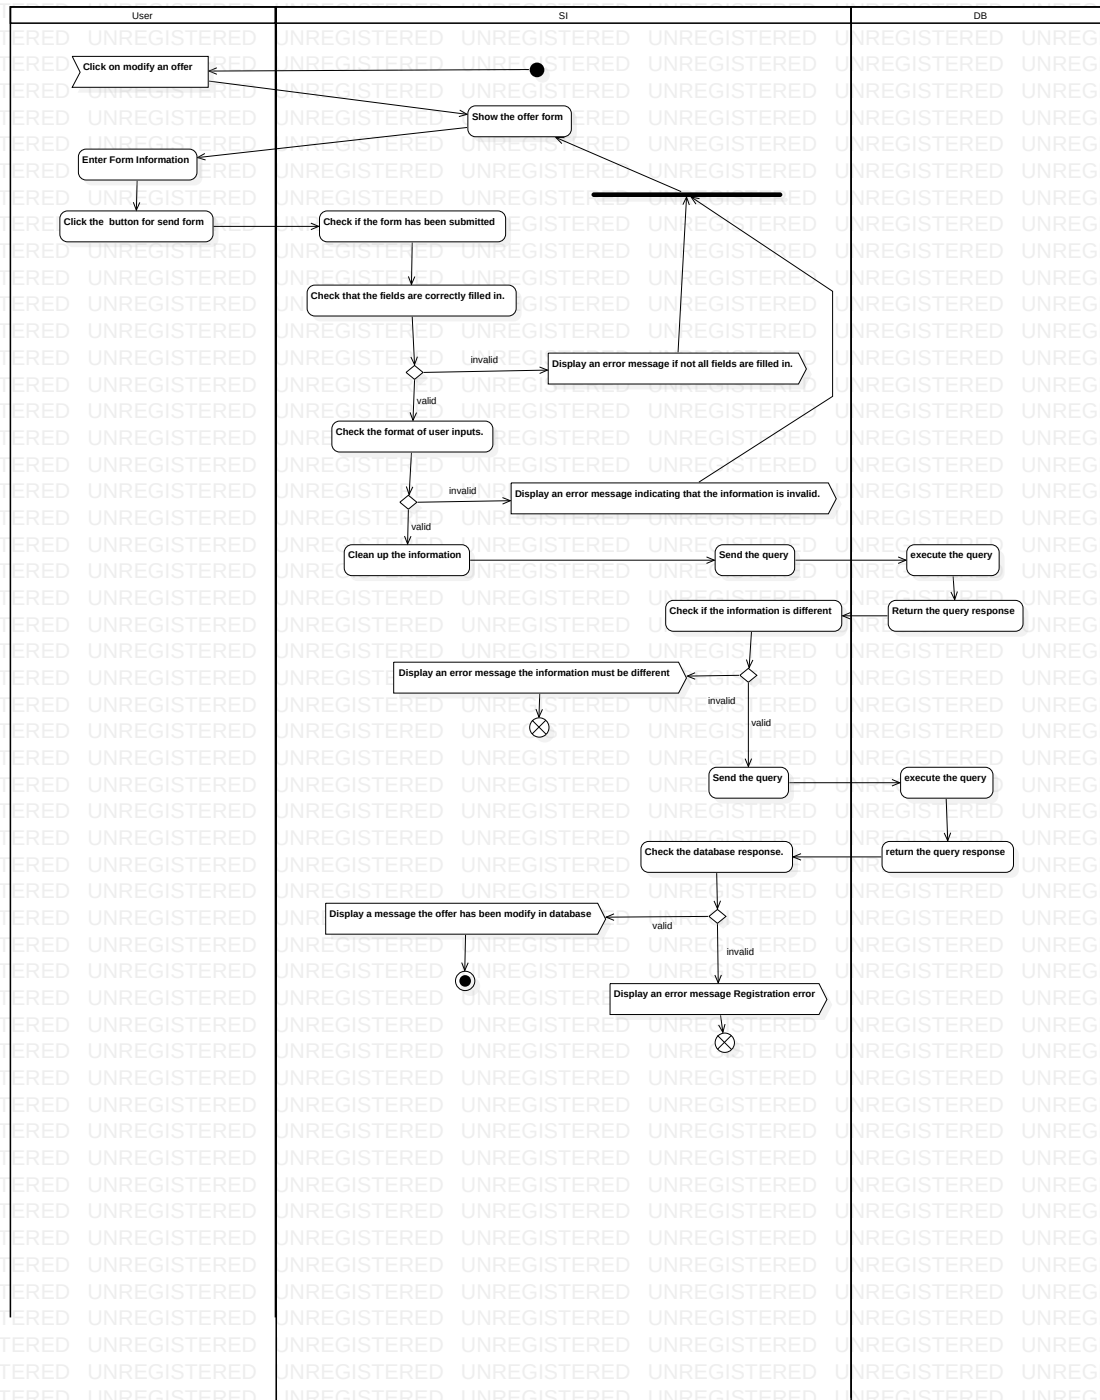

Step 9: Error scenario
Unable to communicate with the database
9.1: Displaying an Error Message
9.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 12 : Error scenario
The offer already exists
12.1: Displaying an Error Message
12.2: The Scenario Stops
In the nominal scenario, the offer doesn't exists

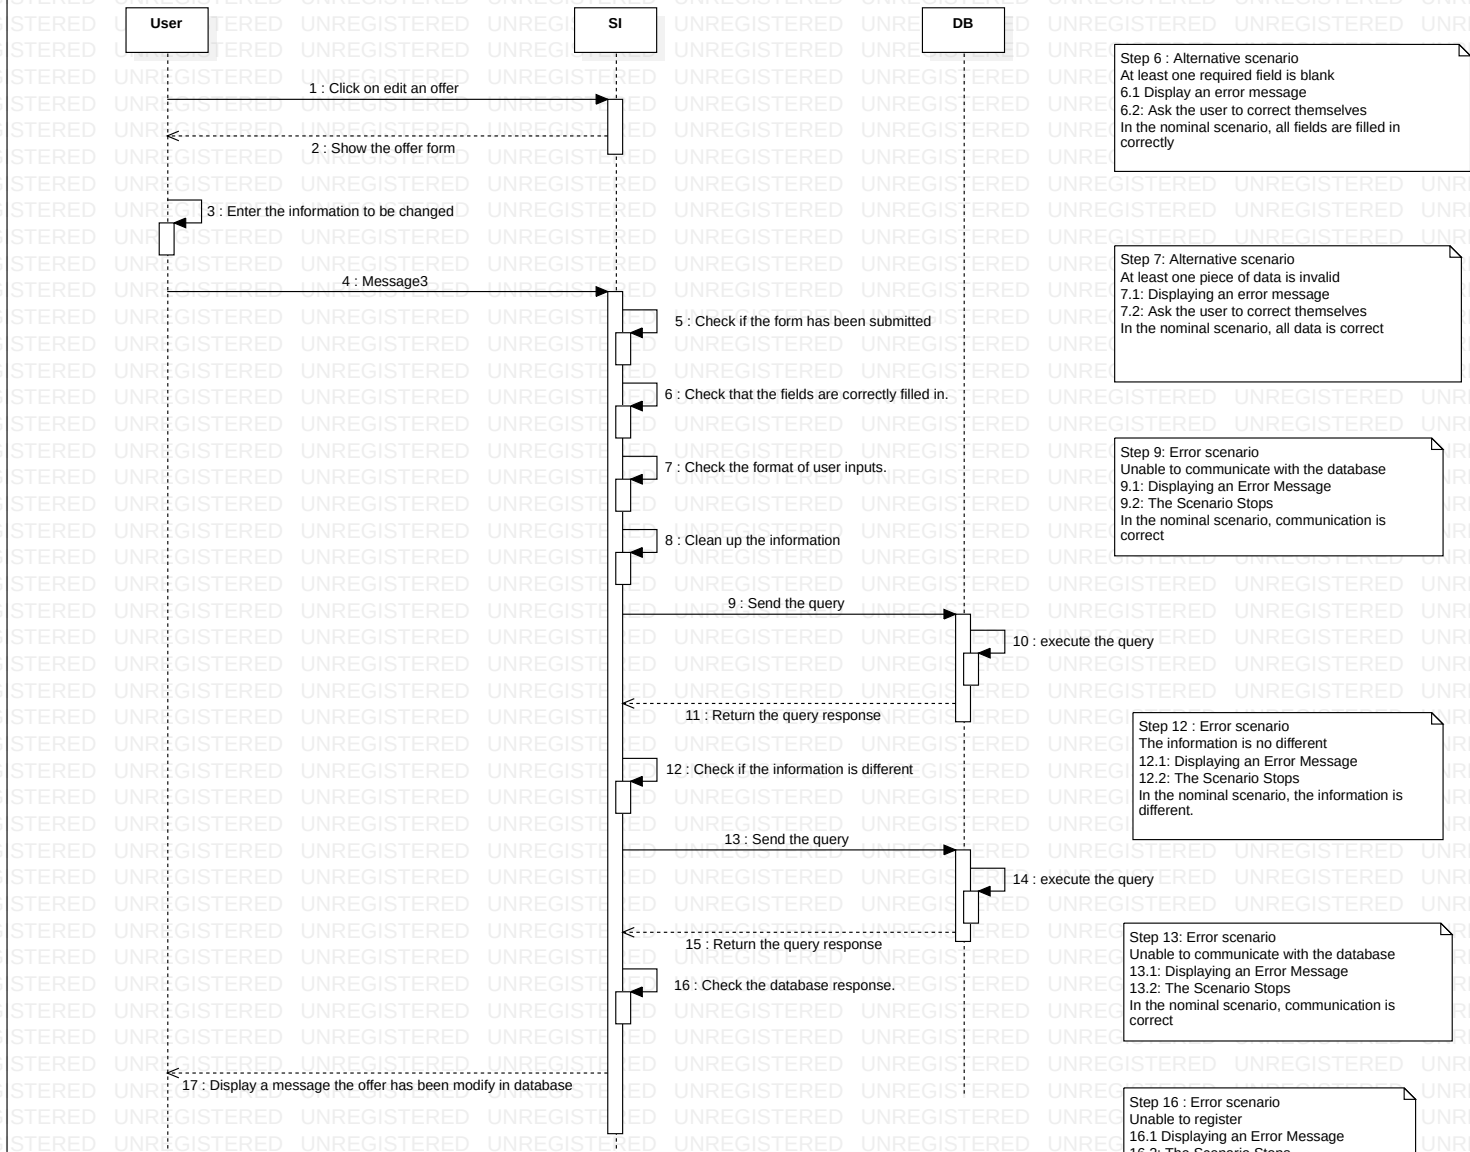

Step 13: Error scenario
Unable to communicate with the database
13.1: Displaying an Error Message
13.2: The Scenario Stops
In the nominal scenario, communication is correct

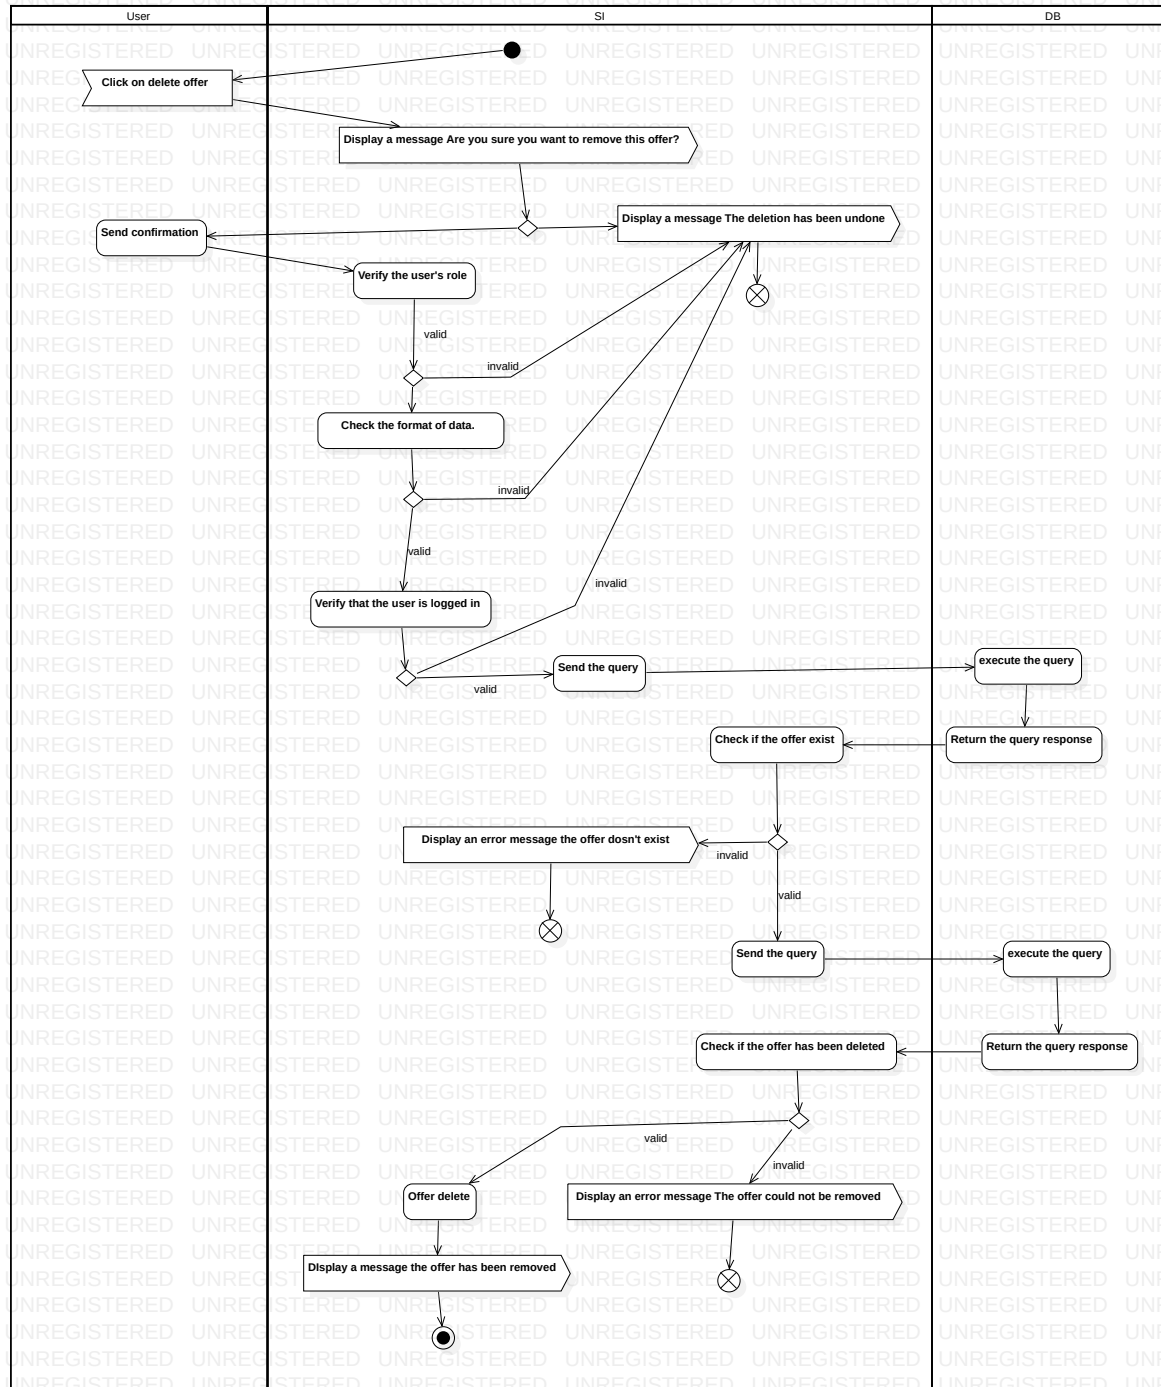

step 16 : Error scenario
Unable to register
16.1 Displaying an Error Message
16.2: The Scenario Stops
In the nominal scenario the recording was done successfully

DB

1 : Click on delete offer

2 : Display a message Are you sure you want to remove this offer?

3 : Send confirmation

4 : Verify the user role

5 : Check the format of data.

6 : Verify that the user is logged in

7 : send the query

9 : Return the query response

10 : Check if the offer exist

11 : Send the query

13 : Return the query response

14 : Check if the offer has been deleted

15 : Offer delete

16 : Display a message the offer has been removed

Step 4 : Error scenario
The role does not match
4.1 Display an error message
4.2: Ask the user to correct themselves
In the nominal scenario the role fits well

Step 5 : Error scenario
At least one piece of data is invalid
5.1: Displaying an error message
5.2: Ask the user to correct themselves
In the nominal scenario, all data is correct

Step 6 : Error scenario
User not connected
6.1 Displaying an error message
6.2 : Ask the user to correct themselves
In the nominal scenario user has been connected

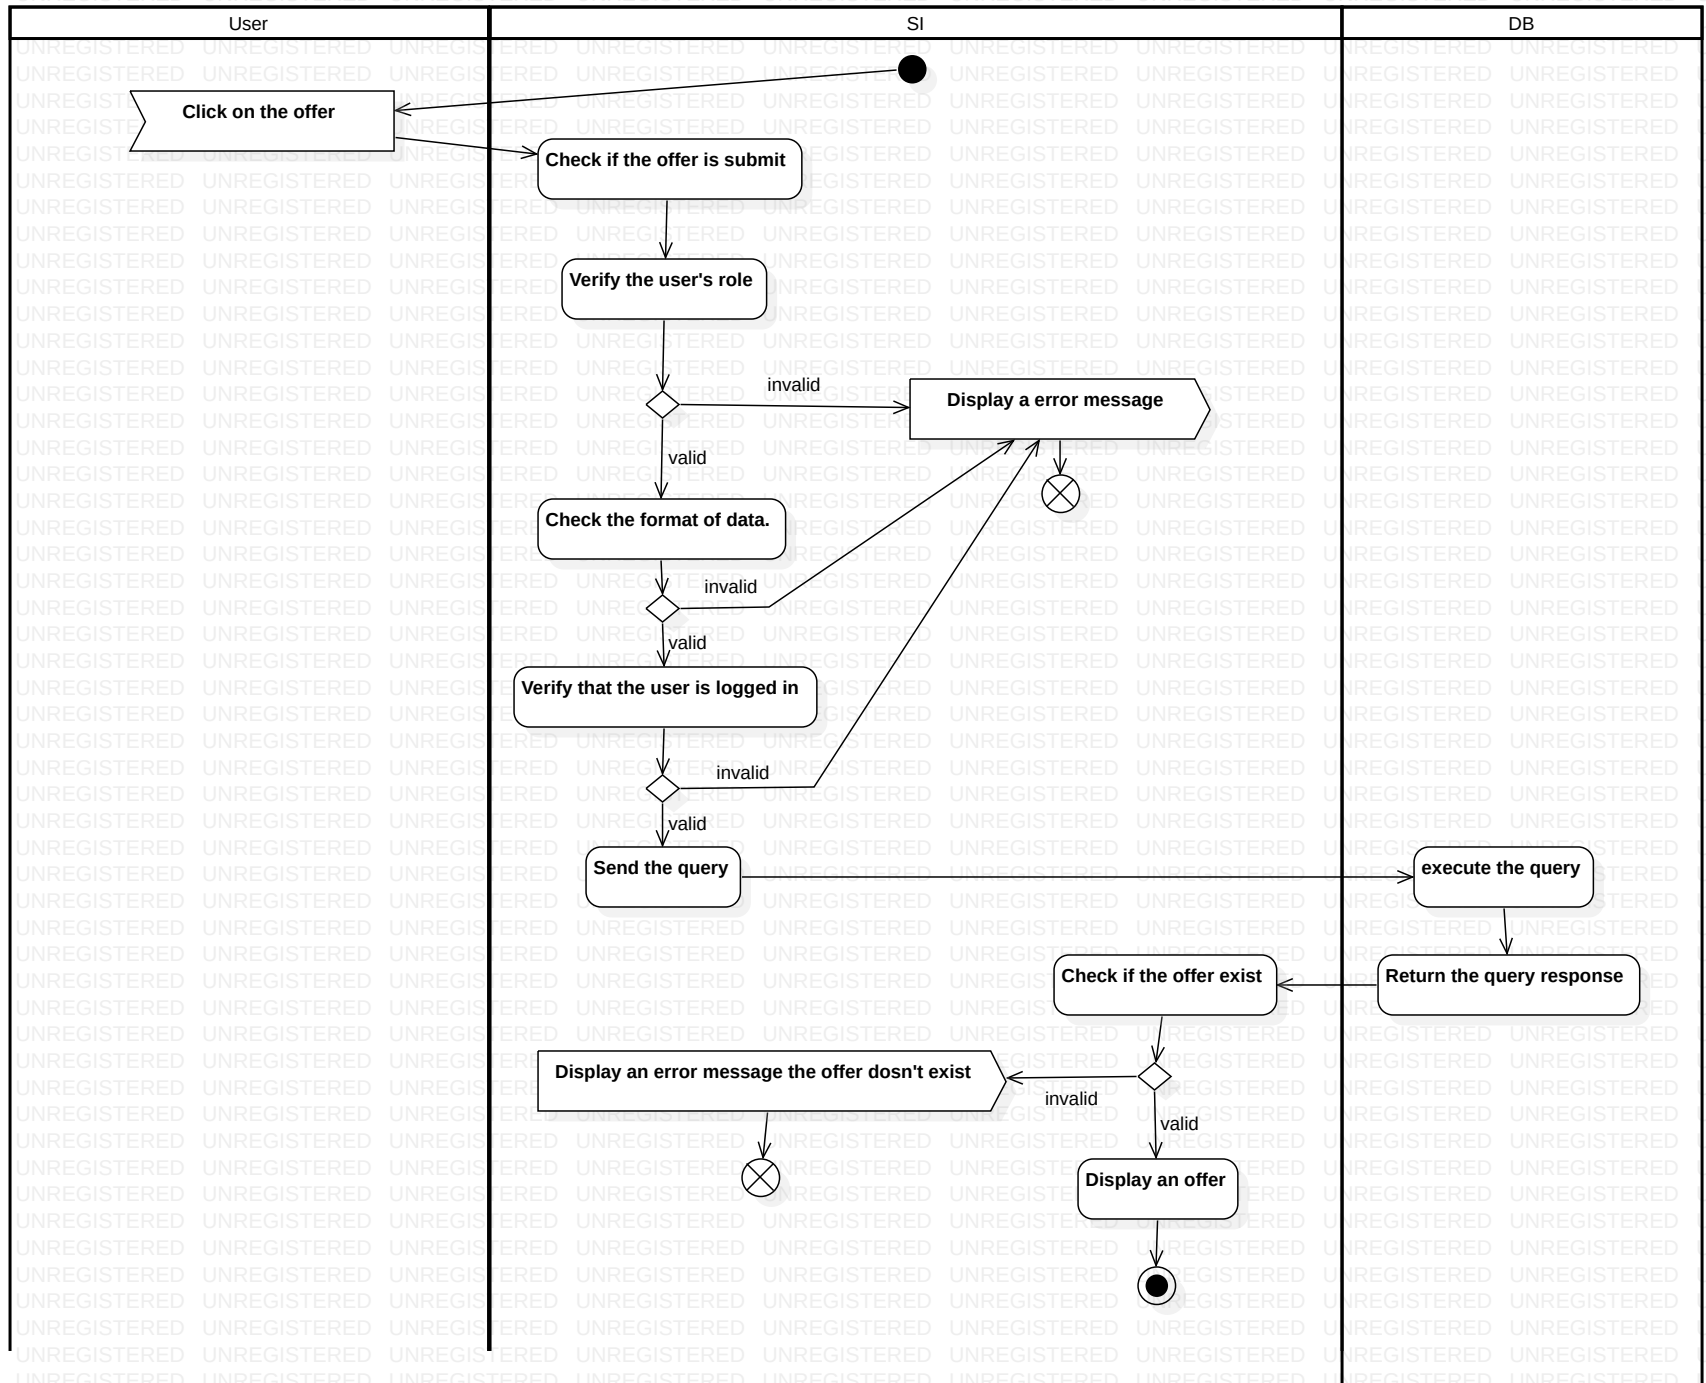

Step 7: Error scenario
Unable to communicate with the database
7.1: Displaying an Error Message
7.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 10: Error scenario
the offer doesn't exist
10.1: Displaying an Error Message
10.2: The Scenario Stops
In the nominal scenario, the offer exist

Step 11: Error scenario
Unable to communicate with the database
11.1: Displaying an Error Message
11.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 14 : Error scenario
The offer is not removed.
14.1: Displaying an Error Message
14.2: The Scenario Stops
In the nominal scenario the offer has been removed
