DB

1 : Click on the account

2 : Check if the account is submit

3 : Verify the user role

4 : Check the format of data.

5 : Verify that the user is logged in

6 : Send the query

8 : Return the query response

9 : Check if the account exist

10 : Display an account

7 : execute the query

Step 3 : Error scenario
The role does not match
3.1 Display an error message
3.2: Ask the user to correct themselves
In the nominal scenario the role fits well

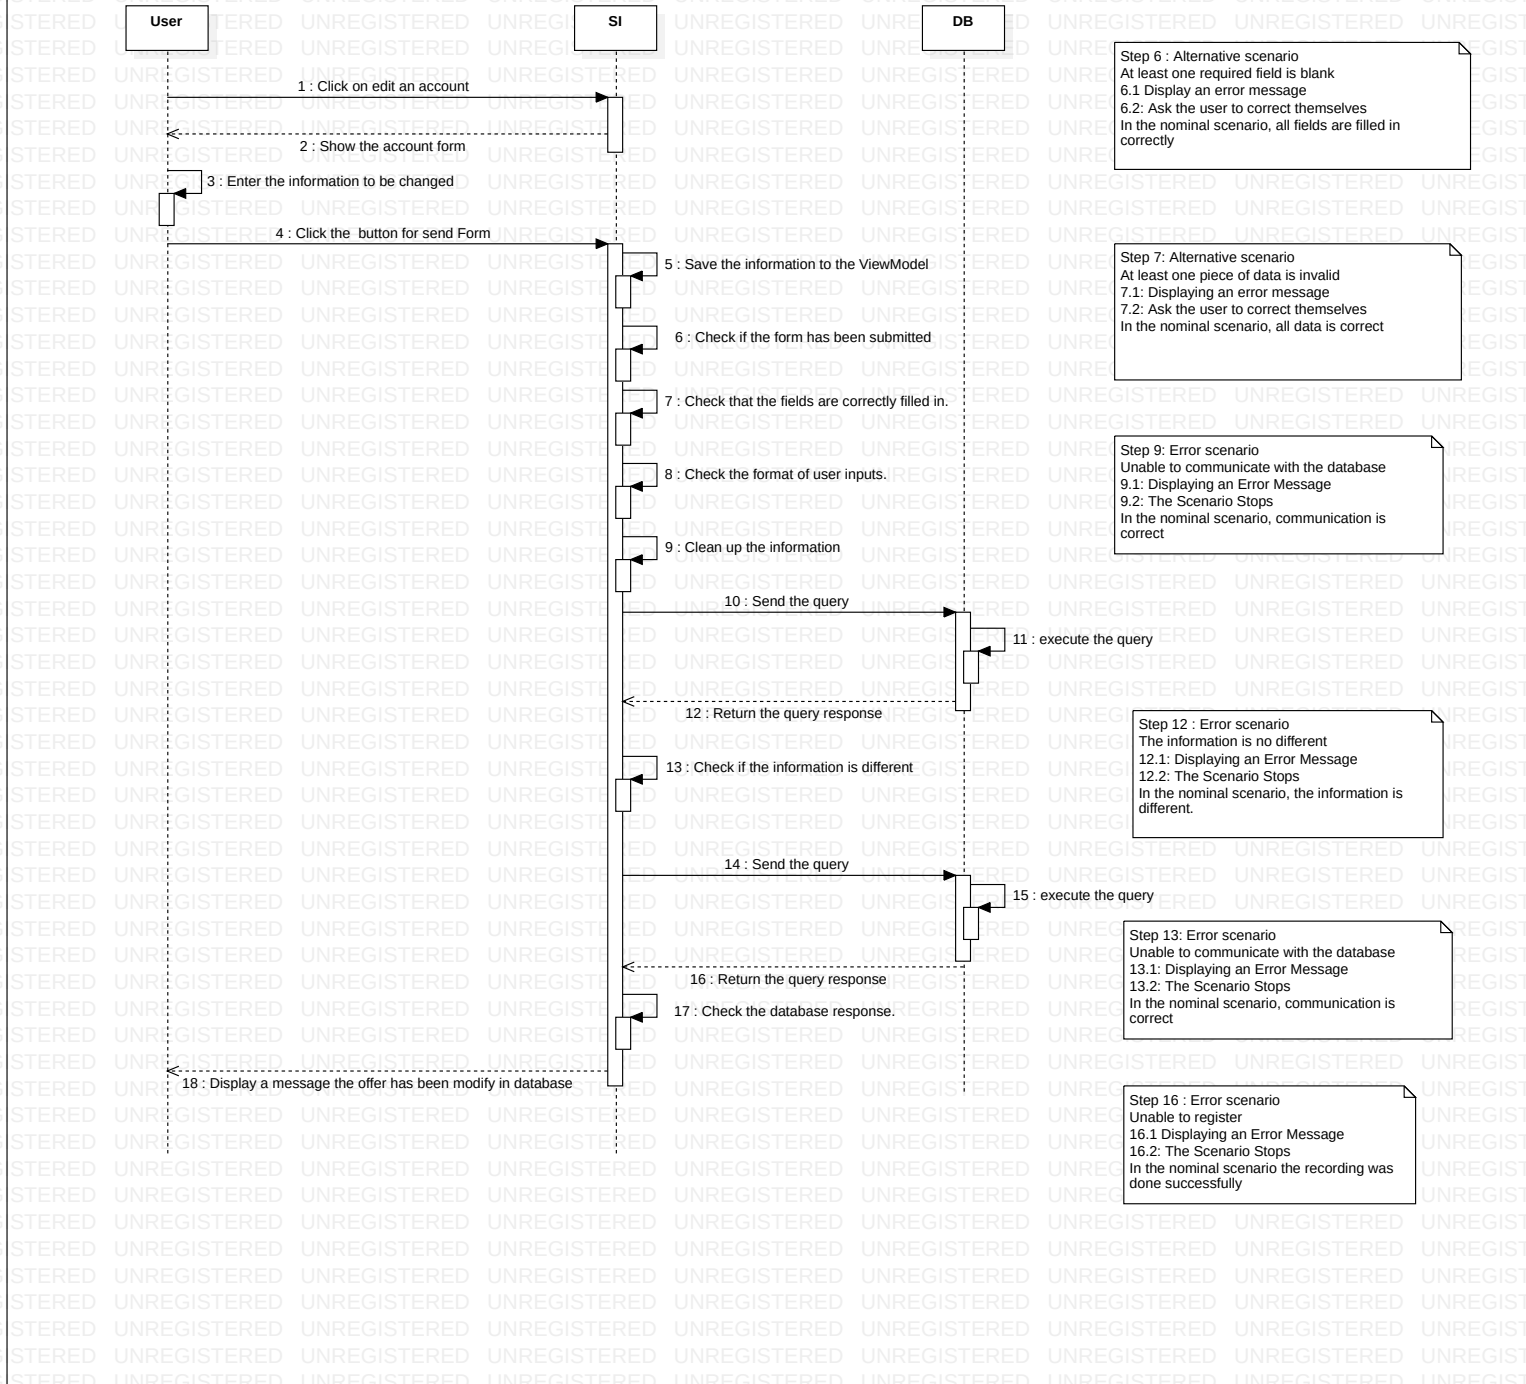

Step 4 : Error scenario
At least one piece of data is invalid
4.1: Displaying an error message
4.2: Ask the user to correct themselves
In the nominal scenario, all data is correct

Step 5 : Error scenario
User not connected
5.1 Displaying an error message
5.2 : Ask the user to correct themselves
In the nominal scenario user has been connected

Step 6: Error scenario
Unable to communicate with the database
6.1: Displaying an Error Message
6.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 9: Error scenario
the offer doesn't exist
6.1: Displaying an Error Message
6.2: The Scenario Stops
In the nominal scenario, the offer exist

Update an account - DSS: Update an account - DSS: Update an account - DSS
sd Update an account - DSS

Step 6 : Alternative scenario
At least one required field is blank
6.1 Display an error message
6.2: Ask the user to correct themselves
In the nominal scenario, all fields are filled in correctly

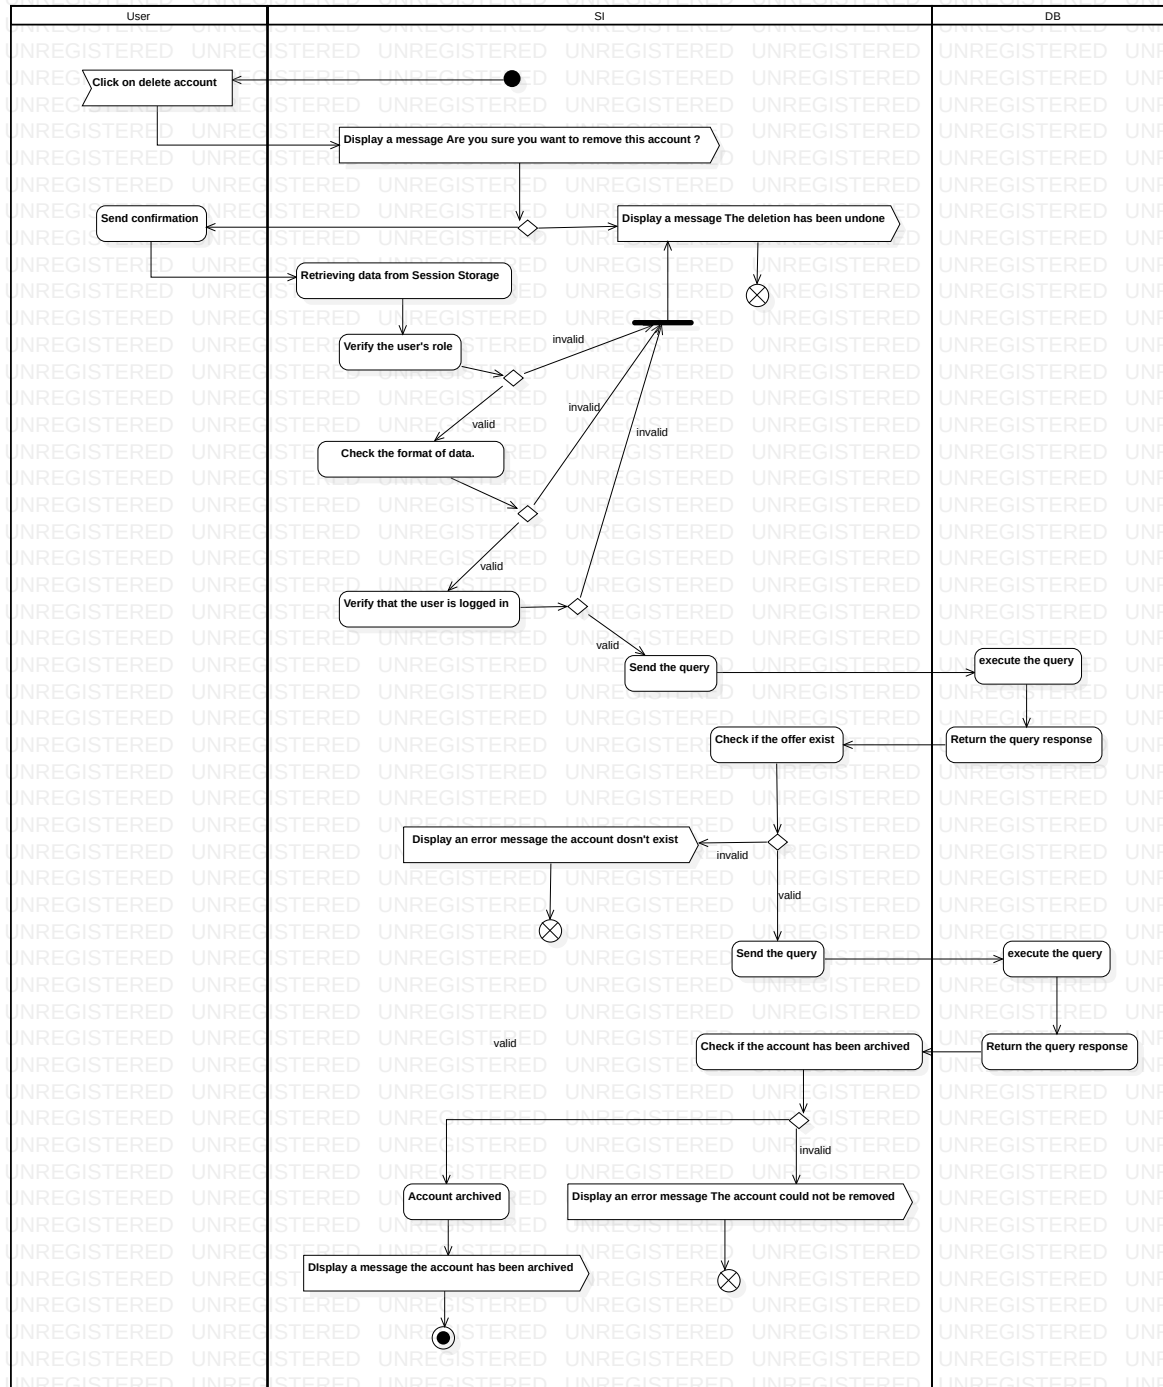

Step 7: Alternative scenario
At least one piece of data is invalid
7.1: Displaying an error message
7.2: Ask the user to correct themselves
In the nominal scenario, all data is correct

Step 9: Error scenario
Unable to communicate with the database
9.1: Displaying an Error Message
9.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 12 : Error scenario
The information is no different
12.1: Displaying an Error Message
12.2: The Scenario Stops
In the nominal scenario, the information is different.

Step 13: Error scenario
Unable to communicate with the database
13.1: Displaying an Error Message
13.2: The Scenario Stops
In the nominal scenario, communication is correct

Step 16 : Error scenario
Unable to register
16.1 Displaying an Error Message
16.2: The Scenario Stops
In the nominal scenario the recording was done successfully

DB

1 : Click on delete account

2 : Display a message Are you sure you want to remove this account ?

3 : Send confirmation

4 : Retrieving data from Session Storage

5 : Verify the user role

6 : Check the format of data.

7 : Verify that the user is logged in

8 : send the query

9 : execute the query

10 : Return the query response

11 : Check if the account exist

12 : Send the query

13 : execute the query

14 : Return the query response

15 : Check if the account has been archived

16 : Account archived

17 : Display a message the account has been archived

Step 5 : Error scenario

The role does not match

5.1 Display an error message

5.2: Ask the user to correct themselves

In the nominal scenario the role fits well

Step 6 : Error scenario

At least one piece of data is invalid

6.1: Displaying an error message

6.2: Ask the user to correct themselves

In the nominal scenario, all data is correct

Step 7 : Error scenario

User not connected

7.1 Displaying an error message

7.2 : Ask the user to correct themselves

In the nominal scenario user has been connected

Step 8 : Error scenario

Unable to communicate with the database

8.1: Displaying an Error Message

8.2: The Scenario Stops

In the nominal scenario, communication is correct

Step 11: Error scenario

the account doesn't exist

11.1: Displaying an Error Message

11.2: The Scenario Stops

In the nominal scenario, the account exist

Step 12: Error scenario

Unable to communicate with the database

12.1: Displaying an Error Message

12.2: The Scenario Stops

In the nominal scenario, communication is correct

Step 15 : Error scenario

The account is not removed.

14.1: Displaying an Error Message

14.2: The Scenario Stops

In the nominal scenario the account has been archived
